

Reduce the waiting time for delivery of orders and thereby improve service efficiency.

## Fast-track service for guests

Our server paging systems inform staff of orders ready to be picked up in the kitchen, helping to serve your guests more quickly.

### "Replace the bell"

Your staff will have more time for guests due to the reduced paths and can also be sure that don't forget to place an order.

## HOW IT WORKS

1

### Assign

The operator receives a numbered, portable pager.

2

### Notify

The kitchen or bar staff presses a button on Transmitter to inform the operator when orders are ready for pickup.

3

### Serve

The staff will retrieve the Place orders in the kitchen and serve the guest.

### Improve your guest's experience

The service staff is discreetly informed about completed orders and can serve quickly.  
Cold food or even forgotten orders are a thing of the past.

### Strengthen your staff

Our pagers guide your staff and ensure better Organization.  
This reduces stress for your staff and improves the overall workflow.  
The atmosphere is better. The guest notices that too.

### Increase productivity

Service paging allows the staff to spend less time waiting in the kitchen for orders. This way, waiting times can be better utilized and more attention can be given to guests.  
The service staff gains over 10% more time!

PAGER

**RX-SP4 - Personal Pager**

The LED pager with the strong Vibration motor! With 4 LED lights, the call can be displayed optically and haptically with the number of vibrations, indicating which station the call came from. The pager is shock-resistant and waterproof.

**RX-AP2 - Alpha Pager**

The small, handy, battery-powered Alphanumeric pagers. The multi-color display shows you the messages and the standby screen in your desired colors. Even after delivery, the pager's options can be easily adjusted through the menu alone.

TRANSMITTER

**TX-9561EZ**

This transmitter is the ideal entry-level model for employee calls. With just one touch, up to 20 pagers can be called directly.

**TX-7471**

Our professional device has a range of up to 5 km, is highly stable, and offers many uses and settings. It works with all LRS-Systems.

Accessories

**Leather holster LED-Pager**

The leather holster provides a practical way to carry the SP4 employee LED pager safely and securely on the belt.

**Keypad protection (P1-0064)**

Cleanliness and durability supported by the silicone keyboard protector. Peel off, wash off, apply.
