

## Installation options for RFID tags

### Direct table sticker

There are several ways to label the table with RFID tags.

If you glue the entire table from the bottom, it doesn't matter where your guest places the Table Tracker - you can locate it as if by magic!

Of course, partial decals are also available. possible.

The tags can be placed either individually or consecutively at locations of your choice.

In this case, however, it is necessary to indicate to the guest where to place the Table Tracker on the table so that localization can take place.

The RFID tags can be applied both under and on the table.

For table stickers, we recommend a special sticker that protects the tags from vandalism.

Full-surface sticker on the underside of a

with integrated RFID-Tag

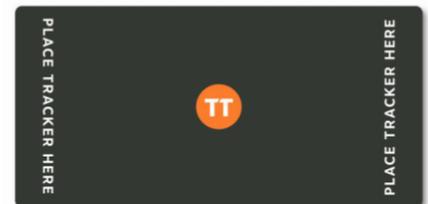

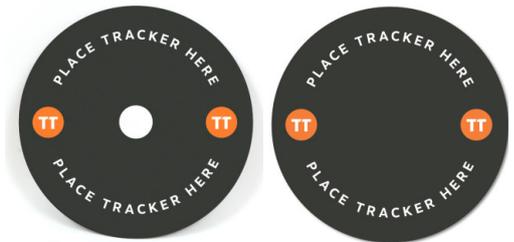

### Using elements with integrated tags

If you don't want to directly stick your table, just use our docks.  
With their integrated tags, the movable docks are  
a cost-effective alternative to stickers.

Using table mats with integrated tags that can be used indoors  
and outdoors is also possible.

The covers can be equipped with a special film upon request,  
which also makes it possible to use them on metal tables.
