LRS *in logistics*
yard management

YARD MANAGEMENT

How to manage the movements of trucks in the yards
to be at the right time in the right place?

YARD MANAGEMENT

LOGISTIC PAGER

RX-AP2: Standard Text Pager

„if you want to manage messages“

RX-AC8

„The Logistics-Pager with Display – not to small and never get lost.“

RX-CS6

„Priceline solution with just one command: COME HERE.“

Connectify

Stand-alone System

Sent your individual or stored messages up to 5km with one transmitter

Embedded System

a) Out of your logistic-software a directly connected transmitter (RS232 or VPN/LAN) sends a page controlled by your system

b) Using third party logistic software that is connected i.e. to your SAP-modul - sending a page through the onsite transmitter infra-structure for larger areas

c) We proudly present TOKNOW - our LRS logistic cloud-Solution with integrated API - really fast adopted to your processes with all our knowledge.

Stand-alone vs. Embedded systems

- Stand-alone System
 - + no integration cost
 - + best price solution
 - no page documentation
 - no transmitter infra-structure
 - no software process integration
- Embedded System
 - a) small system
 - + optimal workflow
 - + full systemintegration
 - no integration SMS/Email
 - Programming cost
 - b) Third Party System
 - + managed infra-structure
 - + SMS/Email
 - + Remote access
 - limited integration cost
 - c) TOKNOW Cloud solution
 - Advantage of b) and more
